

## CEIG INVESTOR CONFERENCE 2023

Towards320

### SPEAKER BRIEF + EOI Form

#### TOWARDS320 — CEIG INVESTOR CONFERENCE 2023

CEIG launches its inaugural Investor Conference in June 2023. We will bring together different industry voices to learn, share, discuss and debate what is required to meet Australia's energy transition needs, and how we unlock capital and garner investment commitment.

In the new environment of progressive federal and state energy policy and renewable targets, the investment landscape is changing.

But is it enough to secure the clean energy investment Australia needs to meet its goals? How do investors navigate the complexity of the Australian market, how do we shape the market to encourage investment and demand?

CEIG's 2023 Investor Conference will focus on how we get projects to final investment decision and unlock the \$320billion of capital needed in generation, transmission and energy storage over the next decade.

#### Theme 2023:

Toward320

Unlocking Australia's Clean Energy Investment Future

#### ABOUT CEIG

Clean Energy Investor Group (CEIG) is an industry association representing large scale clean energy investors in Australia. We represent 21 domestic and global renewable energy developers and investors with more than 18GW of installed renewable energy capacity across more than 76 power stations and a combined portfolio value of around \$38 billion CEIG advocates on behalf of investors on the policy and market design needed to help unlock low-cost capital for Australia's clean energy transformation.
